Jet Fill tensiometer 300 mm

Code: 514-036

Product Group: Tensiometers

- Advanced, sensitive tensiometer.
- Patented Jet-fill system.
- High accuracy.
- Fast response.
- 6 length options available.

The most advanced and sensitive instrument available for the field measurement of soil moisture. The Jet-fill range includes patented features for superior accuracy and even faster response time whilst retaining the ease of use, maintenance and durability of its counterparts.

At the push of a button, the Jet-fill action releases water into the tensiometer body with no disturbance of the surrounding soil. The large volume, detachable water reservoir enables the unit to be left in place for several months. The recalibrator-style gauge permits zero-point adjustments for research applications.
