Hygrometer / Thermometer 100mm Diameter Dial 10-100% Rh -25 to +45 Deg C.

Code: 506-122

Product Group: Humidity measurement

A precision instrument using specially treated strands of human hair to measure relative humidity. The 100 mm diameter gauge covers the range 10 to 100% RH. A separate set hand with a centre button is fitted to the case to enable the user to monitor changes. Can be wall-mounted or fitted inside a Stevenson screen.
