

Turbidity Tube

Code: [430-250](#)

Product Group: [Paqualab Test Meters](#)

- Two-part tube 66 cm long.
- Range 5-500 JTU.
- Weight: 217g.

The turbidity test is designed to give a measure of the suspended solids content of the final effluent. It is also useful in following the day to day variation in quality of sewage and effluent.
