

Digital Vane Anemometer

Code: [503-060](#)

Product Group: [Wind measurement](#)

- Large Easy to read LCD display.
- Fast, accurate readings.
- Results in m/s, km/h, f/min or knots.

This instrument is suitable for measuring wind speed or air flow for a variety of applications including crop spraying, ventilation surveys and crop storage checks. There is a choice of four metric and imperial measuring units together with a data hold facility.

The specially designed sensor head features a low friction ball bearing design which allows free vane movement giving accurate results at both high and low velocities.

Further Information

Supplied complete with sensor head.
