
Machine information

Machine type EL31-3311/01 ADR 3000 COMPRESSION MACHINE

Compression load frame

Identification plate located at Top Front of Frame Serial no. 1709-2-1006
Capacity 3000 Spherical seating serial no. H1207

Flexural and transverse load frame

Capacity - 100kN Serial no. - 1639-1-1012

Console - Serial no. -

Power pack 1607 Serial no. -

Load pacer - Serial no. -

Load indication

High range load gauge calibrated - to - kN Serial no. -
Low range load gauge calibrated - to - kN Serial no. -
Digital readout unit calibrated 100 to 3000 kN Serial no. 7167
Hydraulic pressure at maximum load 51.6 MPa (7477.3 lbf/in²)

Verification

This testing machine was verified by reference to the proving device(s) as listed overleaf. Before verification the testing machine was loaded three times to its maximum load capacity, and the verification procedure consisted of three series of test loadings. The accuracy and repeatability errors of the machine have been calculated from the average of the three readings at each applied load. The maximum load pointer fitted to load gauges was in use during test three only.

This certificate is valid for not more than 12 months.
