

Digital Colorimeter.

Code: [525-242/01](#)

Product Group: [General laboratory instrumentation](#)

- 8 built-in filters.
- Dual cuvette holder.
- Large LCD display.

This range of colorimeters features a number of advanced measurement functions and is designed for educational laboratory and industrial functions. The instruments are housed in rugged, chemically resistant, structural foam mouldings and have ergonomically-efficient, sloping front panels.

Both models feature 8 built-in gelatin filters covering the visible spectrum fitted onto a switched wheel. The dual cuvette holder enables the sample and a reference to be processed. Measurements can be taken in % transmittance, absorbance or concentration.

Further Information

A general purpose laboratory or portable unit which operates from mains supply or an external 12 V supply. It is supplied complete with 9 built-in filters, 100 disposable cuvettes, recorder output, mains lead and manual.

Accessories

Microsample Cuvettes 10ml (Pack of 100).
