

Submersible Load Transducers

Submersible Load Transducer Assembly 5kN Capacity In Compression.

Code: [27-1573](#)

Attributes: [Load device type](#) = Submersible, [Force Capacity, kN](#) = 5,
[Description](#) = Submersible load transducer, [Weight, lbs](#) = 2.25

Standards:

Distance Piece Stainless Steel for Use with Submersible Load Cells and Axial Strain Transducers.

Code: [27-1293](#)

Attributes: [Description](#) = Distance piece stainless steel for use with
submersible load cells, [Load device type](#) = Stainless Steel distance piece for
use with submersible loads cells, [Weight, lbs](#) = 1

Standards:
