

Spare pH Electrode

Code: [88-2000/10](#)

Product Group: [Microcomputer pH Meter](#)

Low cost gel-filled pH electrode with ceramic diaphragm. Automatic temperature compensation. Polycarbonate body. Range 0-14 pH, 0-80 °C. 1 m cable. For portable meters.

This low maintenance pH electrode is suitable for measurements in aqueous media in general. A storage protector prevents breakage and avoids over pressurisation of the diaphragm.

- Low cost, low maintenance 3-in-1 design for a variety of applications.
- Ultra portable but protected against harsh field conditions
- Heavy-duty electrode handle design optimized for field calibration and storage
