

Laminar Flow Cabinet 220-240V 50Hz 1Ph.

Code: [548-550/01](#)

Product Group: [Micropropagation](#)

Laminar flow cabinets force sterile air over the work surface and minimise the risk of external contamination and cross-contamination between samples which is essential for sterile inoculation of media during techniques such as tissue culture and micropropagation.

- Self-contained unit
- Requires no external speed controller
- Variable fan speed controller
- Pressure gauge

Further Information

For 220-240 V, 50 Hz, 1 ph.
