

Chlorophyll Content Meter for Plants & Crops with Battery RS 232 Cable and Software

Code: [470-045](#)

Product Group: [Plant physiology](#)

- Accurate and reliable results
- Non-destructive
- Lightweight, hand-held design
- Storage of 160,000 data sets

This instrument has been designed to accurately determine the chlorophyll content in plants and crops. Especially useful for improving Nitrogen management programs and is ideal for research and teaching. The ample on-board data storage and hand-held design makes this meter the most field efficient chlorophyll content meter on the market.
