

Electronic Inside/Outside Thermometer

Code: [504-019](#)

Product Group: [Temperature measurement](#)

This digital thermometer can be wall-mounted or free standing to display the ambient temperature. A plug-in probe with 3 metres of cable can be used to obtain the temperature in another area or from outside. The instrument has a memory to recall the maximum and minimum inside the outside temperatures since the last reset. Switchable between degrees celcius and fahrenheit.

- Remote temperature probe.
- Digital display.
- Max/min memory.

Further Information

Supplied complete with display unit, remote temperature probe and 3 metres of cable.
